

# BUTTERBALL BOWL

## HOW TO PLAY

To play this game it is best to use a smaller table about the shape of a football field if one is around.

Sitting at opposite ends of the table, a player kicks off by sliding or flicking the ball across the table with their index and middle finger.

A touch down is scored when the ball is over the edge of the oppsing side without falling off the table.

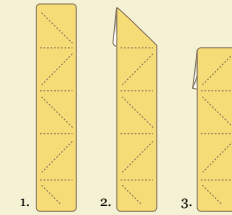

There are 4 chances, 'downs', to get the ball to the edge of the opponent's side of the table. If the ball falls off the edge of the table or the ball hasn't reached the end of the table after 4 downs, it becomes the other player's turn.

After a touchdown is made, the scoring player gets to shoot one field goal. A field goal is flicked like a football punt: with the one forefinger balancing the ball upright and the other flicking. Field goals are made when the scoring player successfully flicks the ball between the opposing player's outstretched fingers. It is now the other player's turn.

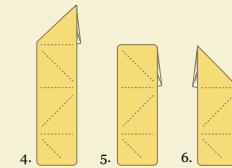

Just like in professional American football, a touchdown is worth 6 points and an extra point is worth 1. First player to 21 is the winner!

## FOLDING INSTRUCTIONS

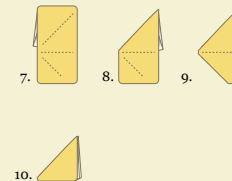

1. Separate the ball piece from the second page by cutting along the dotted line with a pair of scissors or scoring and tearing.

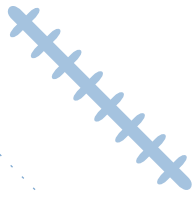

2. Using the small dotted lines on the ball sheet, begin folding back the edges making a series of triangles as you go down.

3. When you get to step 9, fold the bottom corner up and tuck that traingle into the pocket created by the other folds. Now you have a football.

start here by folding back
